

# BOLUWATIFE AJAYI

## Software Developer

### **PERSONAL DATA**

**Email:** bolu4good@gmail.com

**LinkedIn:** [linkedin.com/in/bolu-ajayi/](https://www.linkedin.com/in/bolu-ajayi/)

**Website:** <https://boluajayi.netlify.app/>

**Phone:** +2349124634152

**GitHub:** <https://github.com/boluwatifeajayi/>

### **OBJECTIVE**

As an experienced developer with over 3 years of experience, I am a highly determined and goal-driven individual seeking a dynamic role in a forward-thinking company. My passion lies in creating innovative and engaging websites and applications, and I am dedicated to staying up-to-date with the latest technologies and industry trends. With a strong foundation in computer science, problem-solving skills, and excellent communication abilities, I am confident I can make valuable contributions to your team's success.

### **TECHNICAL SKILLS**

Bootstrap • Tailwind CSS • JavaScript • Git • Typescript • ReactJs • VueJs • React Native • NextJs • Node/ExpressJS • Python • Rest API's • MongoDB • GraphQL • Visual Design • Wordpress • Adobe Photoshop • Problem solving • Team Work • Organization

### **WORK EXPERIENCE**

#### **Black copper**

Frontend Developer Intern

As a Frontend Developer intern at a fintech company, I worked on the web application using Vue Js and Nuxt Js, other side projects with reactJs and the mobile app using React Native. I designed UI, made API calls and requests, created new UIs, and ran tests on the apk for a smooth user experience. My experience at the company allowed me to hone my skills in front-end development and contributed to my growth as a developer. <https://blackcopper.io/>

## **Lampnet Solutions**

Frontend and IT support Intern

During my internship at LampNet Solutions, an agile software development and IT consulting company, I assisted in building technical projects for clients as a Frontend Developer. My experience with Next.js, WordPress, React.js, and remote teamwork allowed me to collaborate effectively with the team and contribute to the success of various projects. At LampNet Solutions, I also gained insight into the software development and IT consulting industries, which will undoubtedly benefit my future career endeavors. <https://lampnets.com/>

## **Soundclaz**

Web Developer

At Soundclaz, a branding agency, I developed various websites for brands using HTML, CSS, JavaScript, React, and WordPress. I also designed flyers and posters for brands, developing a keen eye for design that I applied to my website development work. My experience at Soundclaz allowed me to gain practical experience in web development and design, work with various clients, and gain valuable insight into the branding industry.

## **EDUCATION**

### **Bachelor of Science in Computer and Information Systems, Covenant University 2019 - 2023**

During my four years at Covenant University, I gained a strong foundation in computer science and information systems. The program covered many modules, including object-oriented programming, problem-solving, data structures and algorithms, management theory, software engineering, and more.

**Activities:** Member of covenant university google developer's student club and Hebron startup lab

## **DEVELOPER PROJECTS**

### **EarlyOffice**

I developed a full-stack project for internship postings, applications and tracking, and more, available at <https://earlyoffice.cyclic.app>. I built the REST API with Express.js and MongoDB, and the frontend with React.js. This project allowed me to gain practical experience in full-stack development, including backend and frontend development, API integration, and database management. this project allowed me to showcase my skills as a developer while also contributing to a useful platform that can help students and companies connect more efficiently.

### **NextNomad**

I recently developed a workspace renting web application using Next.js 13, TypeScript, Prisma, and other modern technologies. The project is available at <https://nextnomad.vercel.app/> and allows users to make bookings on workspaces, rent workspaces, and more. Through this project, I utilized Next.js 13 to create a fast and responsive frontend, while leveraging TypeScript and Prisma for database management and code correctness. Overall, this project allowed me to gain practical experience in developing modern, feature-rich web applications using the latest technologies.

### **Blackcopper Web Application**

As an intern at BlackCopper, I worked on a finance management platform project using Vue.js and other technologies. This web application enabled users to send, save, and borrow money. I contributed to the development of various features and learned new skills, working collaboratively with other developers. The project can be found at <http://app.blackcopper.io/> Through this experience, I gained valuable insights into finance management and web development.

### **E-shoppy**

A full-stack eCommerce website called Eshoppy, is available at <https://eshopy.cyclic.app/> The website allows users to create and purchase new products online, and was built using React.js for the frontend, Node.js for the backend, and MongoDB for the database.
